★ 2 Years Experience

SUMMARY

Passionate and self-taught software engineer with strong leadership, management and communication skills.

Desire to learn and adapting to drive successful project outcomes. Meticulous attention to detail and a commitment to ongoing improvement.

WORK EXPERIENCE

FullStack Developer Frontend Focused

Kal-quote

01/2022 – 09/2023

A startup company that specializes in providing a solution to the problem of communication and management between suppliers and customers. As a sole front developer, I created the frontend myself while thinking and selflearning about the best options

- Management and collaboration in a group of 3
- Developed and designed a highly efficient SaaS system
- Created beautiful and responsive designs that made clear and comfortable use for clients
- Improved client satisfaction and retention by communicating actively with clients and team members
- Demonstrated strong problem-solving skills and a willingness to explore innovative approaches in order to deliver an optimal solutions for the company
- Creating custom Hooks Hocs configs and clean code for future rewriting

Fullstack Developer

Freelancer

04/2021 – 09/2023

Dedicated and skilled freelance developer delivering customized web solutions with a client-centric approach. Adaptable and detail-oriented, I consistently exceed expectations, ensuring high-quality results in every project.

SOME PROJECTS

portfolio 🔗

Replicaz

As a personal project, I developed a community-oriented website dedicated to replica shoes and clothes. The platform enables users to create posts and engage in discussions on specific topics related to replica items. Additionally, the website provides valuable resources and guides to help users learn how to order replica items directly from China

TIC-TAC-TOE Online

I conceived, designed, and implemented an online Tic- Tac-Toe game, overseeing both front-end and server-side development. My focus was on delivering a seamless and enjoyable gaming platform for users.

SKILLS
