WORK EXPERIENCE

Frontend Developer   03/2021 - Present

Kal-quote

A startup company that specializes in providing a solution to the problem of communication and management between suppliers and customers. As a sole front developer, I created the frontend myself while thinking and selflearning about the best options

- Collaborates in team of three
- Developed and designed a highly efficient Saas system
- Created beautiful and responsive designs that made clear and comfortable use for clients.
- Improved client satisfaction and retention by communicating actively with clients and team members.
- Demonstrated strong problem-solving skills and a willingness to explore innovative approaches in order to deliver an optimal solutions for the company
- Optimized pages using SSR to reduce loading time by 30%
- Creating custom components Hocs and clean code for future rewriting

PROJECTS

Replicaz

https://replicaz.vercel.app/

As a personal project, I developed a community-oriented website dedicated to replica shoes and clothes. The platform enables users to create posts and engage in discussions on specific topics related to replica items. Additionally, the website provides valuable resources and guides to help users learn how to order replica items directly from China.

- Developed a community-driven website focused on replica shoes and clothes.
- Provided valuable resources and guides to educate users on how to order replica items directly from China
- Designed the website to foster a sense of community and facilitate knowledge sharing among enthusiasts of replica fashion.
- Emphasized user-friendly interface and intuitive navigation to enhance the overall user experience.
