SUMMARY

Passionate and self-taught software engineer with strong leadership, management, and communication skills.
Desire to learn and adapt to drive successful project outcomes. Meticulous attention to detail and a commitment to ongoing improvement.

WORK EXPERIENCE

Frontend Developer
Abra - Web & Mobile   10.2023 - Present

Main-Technologies - JavaScript, TypeScript, React, React Native, Redux, ReactQuery, Styled-components

- Handling **three** projects simultaneously for **MSD**, a renowned **global medical corporation**, highlights my skillful multitasking, strategic planning, and effective **cross-functional collaboration**
- As **lead developer**, I drive our team's efforts alongside the team lead, aligning development with project goals. Additionally, I oversee developers' tasks and deadlines for timely project completion
- I engage proficiently with **international clients**, elucidating project objectives and deliberating on forthcoming features to ensure their aspirations and expectations are in sync
- I've **optimized** our workflow by centralizing all essential elements such as icons, queries, color palettes, and utility functions into custom repositories This enables concurrent usage across both our web and mobile applications, **eliminating the need for redundant code** Additionally, I've integrated all our repositories into a **cohesive monorepo using NX**
- Optimized authorization and permissions system by creating **configuration files** throughout the application, **eliminating nested ifs** and enhanced application integrity and access control efficiency.
- Successfully **improved build performance** and development speed by migrating project from **Webpack to Vite**, leveraging Vite's **faster Hot Module Replacement (HMR)** and optimized bundling.

FullStack Developer Frontend Focused
Kal-quote   10.2021 - 10.2023

Main-Technologies - JavaScript, TypeScript, React, NextJs, Redux, ReactQuery, Tailwind CSS, Sass, Node.js, Express , Mongoose

- Created two systems: an **MVP system** for demonstrating proof of concept to investors initially, and later an **advanced CRM SaaS system**
- Capable of meeting the demands and **rapid timelines** typical of a startup environment.
- **Solely crafted the frontend structure**, integrating **best practices** and appropriate technologies to ensure smooth functioning, responsive designs, and scalability.

Fullstack Developer
Freelancer   05.2021 - 01.2022

A dedicated and talented freelance developer who provides tailored web solutions with a focus on clients. With adaptability and attention to detail, I always go above and beyond, delivering top-notch results in each project.
