As a Full Stack developer with a focus on front-end development, I have a deep understanding of how to create engaging and responsive user interfaces. With extensive experience in HTML, CSS, JavaScript, and popular front-end frameworks like React, I have built and maintained complex web applications with a focus on user experience. I also have a solid understanding of back-end development, including databases and APIs, and have worked with technologies like Node.js, Express, and MongoDB. With a passion for creating clean, efficient, and maintainable code, I am committed to delivering high-quality web solutions that meet the needs of both clients and end-users.

Technical Proficiencies

Programming Languages:	JavaScript, TypeScript, CSS, HTML, Node.js,
Databases:	MongoDB
Frameworks:	React.js, Next.js, Express, Mongoose, Redux, Material UI, Sass ,Tailwind CSS
Tools and General Knowledge:	GIT, Figma, Heroku, Vercel, SendGrid, NextAuth

Career Experience

Kal-quote   **03.2021 – Present**
Front-end Web Developer

Leverage professional expertise, while working in an Agile-driven environment to effectively maintain project timelines and utilise available resources. Develop user-oriented visuals and features using front-end languages and various technologies. Foster and maintain strong working relationships with team members to enhance operational efficiency. Gain thorough grasp of React, typescript, sass, and material UI.

Projects

✔ Replicaz (Personal Project) - https://replicaz.vercel.app/

- TypeScript, React, NextJS, Material UI, Tailwind CSS, MongoDB , NodeJS, express, mongoose.

- As a personal project, I created a website that functions as a community for replica shoes and clothes. the website allows users to create posts and discussions around specific topics related to replica items. Users can also learn how to order replica items by themselves direct from China.

- Developed a social network web app to help people to afford buying expensive clothing and shoes for cheap. Additionally, it shows my ability to identify a market need and create a solution to meet that need

✔ Weather Website (Personal Project) - https://weather-site-gray.vercel.app/

- In my free time, I developed a weather website that provides users with up-to-date weather information for any location.

- To achieve this, I integrated the website with weather API and used various techniques to ensure the website's performance and user experience were optimized. The website also includes various features such as a search function, detailed weather forecasts.

- This project allowed me to enhance my skills in web development, APIs integration, and user interface design, while also demonstrating my ability to work independently and manage a project from start to finish.

Additional Experience

Combat Medic, Medic Instructor and Commander, and Responsible for medical records, Full Military Service
